## Interpersonal

- Excellent Listening skills
- Good Verbal communication skills
- Owning a task and making sure to complete on time
- Problem solving, Responsibility and Accountability

## Project Experience

**Project Name:** College Management System at LaunchCode liftoff (2018).

**Project Description:** The application has two types of users, Admin and Student. Where admin is existing user and authorized person, he can register a student and provide login Id and password for that student. Student can login and view his/her grades and details. Admin can also add new courses offered at college to the database, search a student and edit the student or update student information and grades, Disable an inactive student in the college

**Tool and Technology:** Windows 102, Java Spring Boot framework, MAMP, Html, CSS, JavaScript, jQuery and IDE IntelliJ

**Project Name:** College Management System an intranet group project during graduation (2003)

**Description-** The application captures the details of the students, staff and courses. The college administrator can capture individual students details while they join the college and keep track of the courses they complete, and the marks secured in each course. The application captures the course fee and dues of each individual student. The application generates reports of students and the payment.

**Tool and Technology:** Windows98, C, C++, Oracle 7.3

## Volunteer Experience

Goshen Elementary School, Glen Carbon IL 2017- Present

Contributing to the Community by participating in classroom parties, field trips and participating in PTO's. Being part of it organizing Assemblies at school, and many other events. Also getting to interact, communicate and collaborate with many people on daily basis through volunteering.

## Certification

- PGDCA (post graduate diploma in computer applications), APLE India, 2001
